## Quick and easy carbon footprinting for your organisation

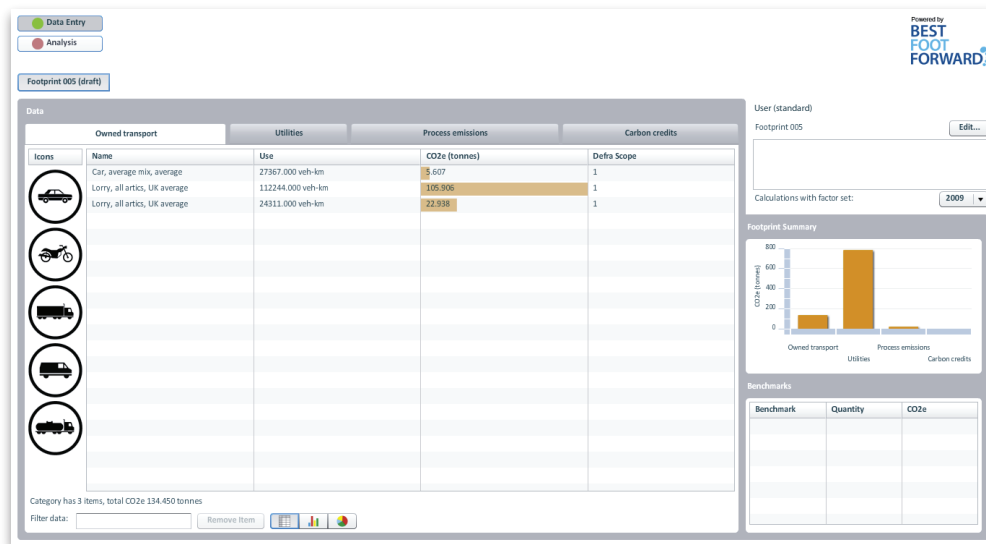

Do you need to calculate the carbon footprint for your business?

Footprint Reporter is a quick and easy carbon reporting tool which can help you:

- *Comply with government carbon reporting standards*
- *Benchmark and track your greenhouse gas emissions*
- *Save money by using energy and resources more efficiently*
- *Impress customers and investors by reducing your footprint over time*

Many businesses find they can reduce costs by reporting and reducing their carbon emissions.

Footprint Reporter has been used by thousands of organisations to measure their footprints. Sign up for free at [footprintreporter.com](http://footprintreporter.com)

“Footprint Reporter will be integral in reducing our carbon footprint. It is already giving insight into where our business has both carbon and cost hotspots.”  
- Linzie Forrester, AMEC

Footprint Reporter helps more than 3,000 users to measure and reduce their carbon footprint

## Free solution

The standard, off-the-shelf version of Footprint Reporter meets the needs of most small and medium sized businesses. It is completely free and you can start calculating your organisation's footprint right away! The software is web-based (so there's nothing to install), secure and easy to use. Sign up for free to access:

- One user account for the tool
- Measurement of two footprints
- PDF graphical reporting with carbon balance sheet
- Footprinting compatible with Defra/DECC recommended reporting guidelines

Sign up for free at [footprintreporter.com](http://footprintreporter.com)

## Customised solution

Footprint Reporter can be customised to suit your needs. We can make sure the tool fits in with how your organisation works, and what you want to achieve. For example, you might want to add scope 3 emissions factors so you can measure the impact from your supply chain and business travel. Talk to us to find out more about adding extra features like these:

- Unlimited users
- Ability to track against your own KPIs
- Integration with existing systems
- Cost/benefit analysis
- Tailored emissions data
- Unlimited footprints
- Custom reporting
- Other metrics, e.g. ecological footprint
- Internationalisation
